Defined Professional Pathways

Our specialization in Enterprise

Information Systems trains you in data management and IT processes and tools that are applicable across numerous different roles and helps prepare you to take the **SAP TS410 certification exam**. Master the skills to earn a role as a professional consultant, business process analyst, IT infrastructure specialist, or SAP functional analyst.

The **Project Management specialization** prepares you to sit for either the **Certified Associate in Project Management (CAPM)** or the **Project Management Professional (PMP) certification exam**. With a required course in conflict resolution, negotiation, and teamwork; an in-depth seminar in project management; and other courses covering technological and strategic elements of project management, this specialization is your pathway to a successful career in any industry.

Rapid Impact

Our Online MBA program is designed for professionals who don't want to wait more than a year to see results in the workplace. That's why our **innovative FAST (Focused. Applied. Strategic Training) electives** make an impact in your career in a matter of weeks.

Each FAST elective is worth 1.5 units; trains you in immediately applicable skills and tools like Excel, Salesforce, CRM/Salesforce, and persuasive writing; and can be completed in just three weeks.
